Working for God

About 1 month ago I set out to help a family in Tijuana, Mexico in need of a new house. Me and my friends went on behalf of and are affiliated with the B.A.M foundation that often performs deeds similar to this on a regular basis. My work was making and helping lay the foundation of this house. We finished this project in about 5 hours. This experience was very eye-opening to me because it made me realize that we in orange county live in a bubble to the world. This formed my mind to not take my privilege for granted. I believe that I demonstrated "The Dignity of Work and the Rights of Workers." I believe that I dedicated this work to Give to Gods people and not just working for the benefit of myself. I felt that hadn't done anything for God and that I was just asking for God's love with no giving back. This is the reason I felt called to serve.
