

I picked up trash around my neighborhood with my mom and sister. I decided to pick up trash because the earth is god's creation and I personally love taking photos of it. Even though I won't be taking pictures on this path it is still important to clean it up for everyone else to appreciate and to clean god's creation. I did this project on March 23rd and I walked for about 4 hours picking up all sorts of trash mostly small wrappers that take forever to decompose and ruin the earth. At the end, I had fully filled up 2 trash bags with trash. The CST that is displayed in my project was "Care for God's Creations."
